

MHP 2000

Multihead processing system

Maximum packaging speed

Profit maximization

ROI within 3-12 months

Suitable for small punnets

MHP 2000

Multihead processing system

The multihead processing system MHP2000 processes prefilled small punnets of fruit, vegetables, meat and cheese to ensure a minimal giveaway amount.

The ten weighing scales on the MHP2000 are manually loaded by an operator to add the final piece to the prefilled small punnets for automatic weight optimization. With two scales installed into the infed belt, the MHP2000 can determine the missing product amount or the missing product combination totals in real time. The operator only needs to observe the green LED-indicator to reach the defined target weight.

The MHP2000 is a flexible weighing system that, in addition to a standard weighing mode for a completed product also has options for weighing on a conveyor belt, combination weighing and throughput.

The MHP2000 offers a significant increase in efficiency in the packaging process. The optimal combination of the products reduces the giveaway to a minimum while the packaging speed is improved with minimal personnel deployment. This noticeably reduces costs and increases profits.

Connected with the TopControl software StatisticsWeights all weights and staff times are completely recorded, for efficient evaluation and reporting.

HIGHLIGHTS

Maximum packaging speed

Profit maximization

ROI within 3-12 months

Suitable for small packaging

Minimisation of the work steps

Maximum reduction of the giveaway

Flexible use

Also more than 25 packs/minute

Packing according to WELMEC 6.4/e for pre-packed goods

Robust and hygienic design in stainless steel - IP65

Intuitive touch display

Efficient staff time recording with integrated RFID reader

Optimal integration in the TopControl software for data registration and analysis

TECHNICAL PROPERTIES

COMBINATION SCALE	8 OR 10 WEIGHING TRAYS
Weighing range/division	3 kg/1 g
Scale in infeed conveyor	Weighing range/division: 3 kg/1 g - Maximum weight 10 kg
Max. punnet size (L x W)	220 x 190 mm
Operating modes	Completion weighing on infeed belt combination throughput
Transport direction	right-left or left-right
Display	Colour LCD touch display 7 inch
Interfaces	Ethernet 10 Base T, TCP/IP, RS 232, RS 422
Protection	IP65
Unit design	compact and modular structure in stainless steel
(!) Non-verifiable scales - for internal use	

Model	Direction		Storage for boxes	Foot extension 120 mm
	left-right	right-left		
MHP 2000 with 10 weighing trays	x	x	x	x
MHP 2000 with 8 weighing trays	x	x	x	x

Weighing trays

The 10 weighing trays of the MHP 2000 are available with the dimensions 250 x 140 mm (L x W). These are used to calculate the optimum weight with the minimum giveaway.

With the version MHP 2000-8 you get 8 weighing trays which have a distance to each other so that products with a maximum width of 190 mm can be weighed on them.

Foot extension

Ergonomic foot extensions allow the combination scale to be adapted to the workers and thus ensure more comfortable working throughout the entire working time.

The right working height allows the workers to be faster and to tire later.

The foot extension allows for an additional height of 120 mm.

Ergonomic storage for boxes

In order to ensure fast and optimised work, optional, ergonomically adapted crate trays can be mounted on the combination weigher. The incoming products can be placed on these. The settings enable a comfortable working method that has been thought through as a whole. The workers always have the full boxes at hand.

MHP 2000

Multihead processing system -10 scales- Running direction right-left or left-right

Technical drawings

Optimised for medium-sized vegetables and fruit, cheese, meat and fish.

*ergonomically height-adjustable with the optional foot extension, an additional 120 mm height is possible

MHP 2000

Multihead processing system - 8 scales - Running direction right-left or left-right

Technical drawings

Optimised for medium-sized vegetables and fruit, cheese, meat and fish.

*ergonomically height-adjustable with the optional foot extension, an additional 120 mm height is possible
