About TopControl

TopControl was founded in 1991 by Michael Saltuari and is one of the world's leading suppliers of innovative automation solutions in the food industry. With more than 80 dedicated employees, TopControl plays a significant role and can boast strong global growth in recent years.

TopControl is the competent partner for automation and system solutions in the industrial environment. We plan, develop and implement customised total solutions for production and logistics control, especially in the fruit and vegetable sector. The product portfolio ranges from smart system scales and labelling solutions to complete, sophisticated packing lines for the food industry, including software solutions that guarantee maximum ease of use.

Technical innovation is a top priority at TopControl. Devices, as well as software, are developed, designed, programmed and produced in-house. Everything starts with the customer's requirements. Our goal is to develop innovative ideas with a technical edge for our customers, which lead to an improvement and greater efficiency of the production processes. With the background of our knowledge and experience, we deal with innovative technologies and solutions in order to continuously achieve a technological lead.

Quality is anchored in our thoughts and actions; this applies to company management as well as employees.

YOUR PROJECT IN GOOD HANDS

As a client, you expect sensible planning of your packing line and smooth project execution. You want to be able to rely on the quality and reliability of your partner. TopControl can boast numerous satisfied customers and renowned projects from over 30 years of business activity.

We offer you customised and reliable project support, regardless of the size and complexity of your project. Because TopControl thinks holistically and makes all the considerations that are important for the success of your project. Our view goes beyond the end of the plate or the standard solution. In this way, we ensure that your project can be handled efficiently as an overall solution.

Our project managers always keep an eye on all the details to ensure that your project is realised according to the defined specifications. By using tested solutions and systems, we can ensure efficient implementation and commissioning.

Our departments at your side for a successful project: sales, product management, project management, mechanical-, software- and hardware development, production and the service center.

intelligent **weighing**solutions

TopControl weighing solutions optimise the packaging process for the food industry. We deliver the right solution for your product so that you can work faster and more efficiently. You will increase your profit considerably in less than a year. You can save on staff, on giveaways and increase your productivity. In combination with our smart software solutions, you can analyse your packing line in real time.

Manual weighing solutions

SSC 9200
Intelligent table scale

RSC 9200
Smart removal scale

NEW

IWS 3000
Weighing table with integrated smart scale, illumination, waste bin and much more.

Combination scale

MHP 1000
Manual scale for optimal weight combination

MHP 1200
Semi-automatic scale for optimal weight combination

MHP 1300
Semi-automatic scale for optimal weight combination

MHP 2000
Semi-automatic scale for optimal weight combination

MHP 2100
Semi-automatic scale for optimal weight combination

NEW

MHP 3000
Semi-automatic scale for optimal weight combination

Automatic checkweigher

CWT 1000
Automatic checkweigher for small punnets

NEW

CWT 500
Automatic, hygienic checkweigher for transport packaging
ST A500B
Automatic checkweigher for transport packaging

ST EPW310
Automatic checkweigher for bags

Automatic process scale

MHP 5200
Automatic process scale with double-row-belt

intelligent
labelling solutions

Labelling solutions of TopControl offer the right labeller for your packing line. The high-performance labellers are precise, fast, gentle on the product and definitely the right choise. Our labelling solutions can be integrated into existing production lines or used as stand-alone devices.

Labelling without conveyor line

ILS 3000
Labeller for transport packaging without conveyor line

GLT MAXX 9000
Labeller for transport packaging without conveyor line

GPH MAXX
Labeller for pallets without conveyor line

Labelling with conveyor line

GLM-B-S
High speed labeller for small punnets with conveyor line

Price labeller

SPT 500
Manual price labeller integrated in hygienic table

intelligent **packaging**solutions

The TopControl packing lines are precise and cutting-edge customised lines for every requirement.
From planning till installation TopControl cares about everything.
Everything from a single source - thus eliminating numerous component interfaces as potential sources of error.

The perfect combination of individualised developments and experienced installations. Different conveyor belt widths, levels, weighing tables combinated with intelligent weighing solutions tailored to your product are planned and realised according to your requirements.

ALL FROM ONE HAND:
Perfectly coordinated communication between the machines and the software

Maximum reduction of giveaway

Stand-alone and integrated in packing lines

Optimized packaging process with ergonomic integration into the packing line

Maximum productivity

Efficient staff time recording with integrated RFID reader

Minimisation of the work steps

Harvest recording: in the field and/or in the production hall.

Weight, time and activity recording

Sales forecasts

Solutions with lots of advantages. Fully automatic production management and traceability. You will save time and money with the TopControl Software solution by simultaneously increasing efficiency and quality in the production process. A proven improvement.
TopControl software solutions are intuitive and unique that provides a complete overview of the harvest and production process and also of your warehouse.

fruitManager

YOUR COMPLETE OVERVIEW OF THE HARVEST & PRODUCTION PROCESS
In combination with all other TopControl solutions (weighing, labelling and packaging solutions) a maximum increase in productivity is guaranteed. At the touch of a button, the software generates user-defined reports that provide information about weight of giveaways, activities, performance data, sales forecasts and much more. All data is stored in real time on a local server and can be accessed at any time through intuitive dashboards. The recording of performance data enables optimal resource management and significant cost reduction.

storageMove

THE PERFECT WAREHOUSE OVERVIEW
Logistic guide system for storage handling. StorageMove stands for the first in this form realized laser based logistics guidance system for storage handling. Thanks to the modular structure the system can be used in all kind of corporations. The system brings the logistical advantages of a high-bay warehouse for a fraction of the costs on the level of a conventional storage cell. An optimal solution.

Never give up.
Together we will reach new goals.
