Everything in motion

Fruit Vegetables Ready Meal Meat Fish Cheese

IWS 1500 NETWORKED, INTELLIGENT FIELD SCALE

WEIGH DIRECTLY IN THE FIELD. PRECISE. INTUITIVE. EFFICIENT.

Positive and negative weighing or sequential equalisation

Optimisation of the giveaway up to <2%
and up to +30% productivity

ROI within 3-12 months

up to 50% less labour costs

FIELD SCALE FOR PUNNETS AND BOXES (MAX. SIZE 400X600 MM)

Weighing platform: Calculates the optimum weight to keep the giveaway as low as possible.

Control display
This is used to process the entered job. The worker can intuitively see whether the weighed weight corresponds to the target weight, or whether it is underweight or overweight.

User registration
The worker logs on to the terminal via an RFID chip.

Levelling or removal weighing can be defined per article

Dynamic weight limit control

Recording of incoming batches and waste quantities

Up to 40% higher productivity thanks to intuitive display

ROI within 3-12 months

Profit maximisation

Packing according to WELMEC 6.4(e-weight) for pre-packed goods

Up to 30% lower labour costs

Up to 90% less overfilling

Efficient working time recording thanks to integrated transponder reader

100% transparency & traceability - complete control and recording via foodProcess

Improved quality and weight accuracy

THE IWS 1500 IS OPTIMISED FOR

Fruit

Vegetables

Table Grapes

Berries

Mushrooms

With the new Field Scale, TopControl brings its proven industrial-grade hardware beyond the packhouse for the first time. Combined with the intelligent foodProcess software, it creates a **portable smart weighing solution** engineered specifically for the demanding realities of harvest environments.

Many growers want to manage packing operations more efficiently **in the field**. Today, products are often packed “by eye” or with basic standalone scales that are slow, inconsistent and offer no traceability. The result: significant overfilling, unnecessary product loss, and missing data.

At the same time, retailers increasingly require prepacked products with declared weight – making **accurate field packing** more critical than ever. This is exactly where TopControl makes the difference: with the Field Scale,

www.topcontrol.it

we bring a smart, intuitive and fully connected weighing solution directly to your harvest team.

Developed specifically for fresh produce packing, the system combines the latest TopControl technology with our trusted quality standards. With the IWS 1500 and foodProcess, you can avoid almost any overfill. **Harvest workers pack faster, more accurately and more productively – allowing you to make better use of critical harvest windows. Products move quicker from field to cold chain, while 100% traceability is ensured.**

TopControl is one of the world’s leading providers of connected end-to-end packhouse solutions – designed to simplify operations and increase **productivity by up to 40%.**

TECHNICAL PROPERTIES

Weighing platform (mm)	225 x 250 mm Designed for trays and boxes
Weighing range	20kg/2g
Weight	5 kg incl. powerbank
Operating modes	levelling, removal weighing, sequential equalisation
Power supply	PowerBank 20000mAh with up to 30 hours of operating time
Protection class	IP-64
Interface	WLAN 2.4GHz Standard-RFID Mifare
Colour LCD touch display	3,2 inch display
Operating languages	DE - IT - EN - ES - CS - FR - SK - SL - PL - RU
(!) Non-verifiable scales for internal use
